## Prepare the door and check dimensions

If drilling a new door, use the supplied template and the complete door drilling instructions available at [www.kwikset.com/doorprep](http://www.kwikset.com/doorprep)

### A Measure to confirm that the hole in the door is either 2-1/8" (54 mm) or 1-1/2" (38 mm).

### B Measure to confirm that the backset is either 2-3/8" or 2-3/4" (60 or 70 mm).

### C Measure to confirm that the hole in the door edge is 1" (25 mm).

### D Measure to confirm that the door is either 1-3/8" or 1-3/4" (35 mm or 44 mm) thick.

Additional door preparation may be required for doors with 1-1/2" (38 mm) holes. Consult the deadbolt drilling instructions at [www.kwikset.com/doorprep](http://www.kwikset.com/doorprep)

Note: Additional door preparation may be required for doors with 1-1/2" (38 mm) holes.

## Install the latch and strike

### A Hold the latch in front of the door hole, with the latch face flush against the door edge.

### B Is the door edge chiseled?

- **YES**
  - Chiseled
  - Install latch in door with supplied screws.

- **NO**
  - Not chiseled
  - Use a flathead screwdriver to lift tabs on collar of rectangular face to remove it from latch.
  - Install drive-in collar.

### C Is the slotted hole centered in the door hole?

- **YES**
  - Slotted hole is centered
  - No adjustment is required. Proceed to next step.
  - Rotate latch face as shown to extend latch.

- **NO**
  - Slotted hole is NOT centered
  - Rotate latch face as shown to extend latch.

### D Install strike on the door frame.

#### IMPORTANT: Make sure the latch bolt is fully retracted (in the unlocked position).

- **A1** Make sure hole in door frame is drilled a minimum of 1" (25 mm) deep.

- **B2** Install latch in door with wood block and hammer.

- **C1** Install latch in door with screws.

- **D1** Install strike on the door frame.

- **E2** Make sure the slotted hole is at bottom of latch.

- **F2** Ensure collar snaps into place.

- **G2** Pull collar to test for tight fit.

- **H2** Ensure latches snaps into place.

- **I2** Install latch in door with supplied screws.

- **J2** Align tabs with holes in collar.
3 Prepare keypad and mounting plate (only for doors with smaller holes)

What is the diameter of the hole in the door?

Diameter is 2-1/8” (54 mm)

Diameter is 1-1/2” (38 mm)

No adjustment is required. Proceed to step 4.

A Remove adapter ring from exterior assembly:

1. Remove gasket.  
2. Remove adapter ring from gasket.  
3. Reinstall gasket, ensuring tight seal.

B Use pliers to remove two tabs from mounting plate:

D IMPORTANT: Make sure the torque blade is in the horizontal position.

G Insert the torque blade through the horizontal slot in the latch.

F Push the torque blade through the center hole in the mounting plate and send the cable through the bottom hole.

I Remove the key and make sure the latch bolt is still in the unlocked position.

C IMPORTANT: Make sure the latch is fully retracted (in the unlocked position).

Prepare keypad and mounting plate (only for doors with smaller holes)

D IMPORTANT: Make sure the torque blade is in the horizontal position.

G Secure the mounting plate with the supplied screws.

H Insert the key and test the latch for smooth operation.

If latch does not operate smoothly, adjust screws.

M Keep parallel to door edge.

Prepare keypad and mounting plate (only for doors with smaller holes)

D IMPORTANT: Make sure the torque blade is in the horizontal position.

G Secure the mounting plate with the supplied screws.

H Insert the key and test the latch for smooth operation.

If latch does not operate smoothly, adjust screws.

M Keep parallel to door edge.

Prepare keypad and mounting plate (only for doors with smaller holes)

D IMPORTANT: Make sure the torque blade is in the horizontal position.

G Secure the mounting plate with the supplied screws.

H Insert the key and test the latch for smooth operation.

If latch does not operate smoothly, adjust screws.

M Keep parallel to door edge.

Prepare keypad and mounting plate (only for doors with smaller holes)

D IMPORTANT: Make sure the torque blade is in the horizontal position.

G Secure the mounting plate with the supplied screws.

H Insert the key and test the latch for smooth operation.

If latch does not operate smoothly, adjust screws.

M Keep parallel to door edge.
5 Install interior assembly

A Remove the battery cover.

B Load 4 AA batteries into the interior assembly. For best results, use new, non-rechargeable Alkaline batteries only.

C Press and hold the Reset button on the interior assembly for 5 seconds, until you hear 3 long beeps.

D Align the colored edges of the connectors and ensure a tight cable connection.

E **IMPORTANT:** Rotate the turnpiece AWAY from the door edge and make sure the latch is fully retracted (in the unlocked position).

F Make sure the torque blade is still in the horizontal position and install the interior assembly.

G Test the turnpiece for smooth rotation.

H Secure the interior assembly with the supplied screws.

I Reinstall battery cover and make sure the latch is still in the unlocked position.

J Load 4 AA batteries into the interior assembly. For best results, use new, non-rechargeable Alkaline batteries only.

K Press and hold the Reset button on the interior assembly for 5 seconds, until you hear 3 long beeps.

L Enter default User Code (1-2-3-4), then press the Kwikset button.

M Enter User Code.

N Enter User Code. Default 1-2-3-4

O Press Kwikset button.

P During normal operation, press the Kwikset button to lock the door.

Q During normal operation, press the Kwikset button after entering your user code to unlock the door.

R Green (with 2 beeps): The door has successfully learned the orientation of the door. Continue to step 6C. Red (with 3 beeps): Make sure the door is unlocked and that you are using a fresh set of batteries. Repeat step 6A.

S While the door is OPEN and UNLOCKED, enter the following code to teach the lock the orientation of the door:

- Press 0-0-0-0.
- Press Kwikset. You will hear one beep.
- Press 0.
- Press Kwikset.

Note: The keypad will light up in blue when pressed.

6 Set locking and unlocking direction

A While the door is OPEN and UNLOCKED, enter the following code to teach the lock the orientation of the door:

- Press 0-0-0-0.
- Press Kwikset. You will hear one beep.
- Press 0.
- Press Kwikset.

This is your default Programming Code.

1. Press 0-0-0-0.
2. Press Kwikset. You will hear one beep.
3. Press 0.

Note: The keypad will light up in blue when pressed.

B The latch bolt will extend and retract. The lock will beep and the Kwikset button will turn green or red.

C Press the Kwikset button. The latch bolt will extend to lock.

D Enter the default User Code (1-2-3-4), then press the Kwikset button. The door will unlock.

Important: It is recommended that you replace the default Programming Code and default User Code with codes of your own. See page 4.
Quick Setup and Use

How to add additional User Codes

A total of 6 User Codes (and a temporary one-time User Code) may be programmed. Do not program a User Code that is the same as your Programming Code.

1. Make sure the lock is unlocked and the door is open.
2. Enter your Programming Code - for new installation, default is 0-0-0-0.
3. Press Kwikset. You will hear one beep.
4. Press 0
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

The lock cannot be locked or unlocked by unauthorized users.

How to change Auto-Lock time delay

You can change the Auto-Lock time delay between 10 and 99 seconds.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 6
5. Press Kwikset. You will hear one beep.
6. Enter time between 10 and 99 seconds.
7. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

Additional Programming Features

How to enable/disable Auto-Lock

The Auto-Lock feature automatically re-locks your door 30 seconds after unlocking. This feature is off by default.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 5
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

How to use turnpieces

The lock is pre-programmed with a default User Code of 0-0-0-0. It is recommended that you deactivate this code.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 0
5. Press Kwikset. The latch bolt will extend and retract to learn the orientation of the door. If successful, the Kwikset button will flash green and you will hear 2 beeps. If unsuccessful, the Kwikset button will flash red and you will hear 3 beeps (make sure the door is open and unlocked and that you are using a fresh set of batteries).
6. Test the lock: With the door open and unlocked, press Kwikset. The door should not unlock.
7. Test the default User Code: Enter the default User Code (0-0-0-0), then press Kwikset. You will hear one beep.

The lock cannot be locked or unlocked by unauthorized users.

How to add a one-time User Code

A one-time user code may be used only once, and then it will be deleted immediately after use.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 9
5. Press Kwikset. You will hear one beep.
6. Enter a new User Code. It must be between 4 and 10 digits.
7. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

How to reset the lock

The lock cannot be locked or unlocked by unauthorized users.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 3
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

The lock cannot be locked or unlocked by unauthorized users.

Troubleshooting

The lock cannot be locked or unlocked by unauthorized users.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 4
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

The lock cannot be locked or unlocked by unauthorized users.

System Alerts

Kwikset button flashes red 3 times with 3 beeps.

1. Re-enter User Code entered within one minute.
2. Be sure User Code entered after 45 second keypad lockout.
3. Replace batteries.

Important Safeguards

1. Read all instructions in their entirety.
2. Familiarize yourself with the lock and its user interface.
3. Inspect and report any damage or serious defects.

Regulatory Compliance

This product complies with the standards established by the following regulatory bodies:

- Federal Communications Commission (FCC) - Industry Canada (IC)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference that may cause undesired operation of the device.

- Industry Canada - Canada ICES-003

This device complies with Industry Canada license-exempt RSS standards. Operation is subject to the following two conditions: 1) this device may not cause interference and 2) this device must accept any interference that may cause undesired operation of the device.

Troubleshooting

The lock cannot be locked or unlocked by unauthorized users.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 5
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

The lock cannot be locked or unlocked by unauthorized users.

How to restore default settings

This procedure will delete all User Codes associated with the lock, and the default Programming Code (0-0-0-0 and User Code 1-2-3-4) will be restored.

1. Make sure the door is open and unlocked. Press and hold the Reset button for 5 seconds, until you hear 3 long beeps.

The lock cannot be locked or unlocked by unauthorized users.

How to add or delete individual User Codes

If User Codes are disabled (example: when you go on vacation), the lock can only be operated by the key and turnpiece until they are enabled again.

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 3
5. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

The lock cannot be locked or unlocked by unauthorized users.

How to change default User Code

1. Make sure the lock is unlocked and the door is open.
2. Enter your existing Programming Code.
3. Press Kwikset. You will hear one beep.
4. Press 1
5. Press Kwikset. You will hear one beep.
6. Enter a new User Code. It must be 4-10 digits.
7. Press Kwikset. You will hear two beeps if successful. If you hear three beeps, it was unsuccessful. Repeat from step 1 slowly.

Test the code: While your door is open, lock it. Make the screen and turnpiece flash. Enter 10 digits. Enter a new User Code, then press Kwikset. The door should unlock.

The lock cannot be locked or unlocked by unauthorized users.

How to replace batteries

If no digit is pressed for 10 seconds, the system will time out and you will need to restart the procedure.
