1. Prepare the door and check dimensions

A. Make sure your door is compatible. If you have a standard deadbolt mounted separately from the handle below it, your door is compatible. 

B. Remove your existing deadbolt from your door.

C. Measure to confirm that the hole in the door is either 2-5/8" (64 mm) or 1-1/2" (38 mm).

D. Measure to confirm that the backset is either 2-3/4" or 2-3/4" (66-78 mm).

E. Measure to confirm that the hole in the door edge is 1-1/8" (28 mm).

F. Measure to confirm that the door is between 1-3/4" and 2-1/4" (44-57 mm) thick.

2. Install the latch and strike

A. Is the door edge chiseled?

B. Hold the latch in front of the door hole, with the latch face flush against the door edge.

C. Is the D-shaped hole centered in the door hole?

D. Which latch are you installing?

E. Install the strike on the door frame. 

Make sure the hole in the door frame is drilled a minimum of 1" (25 mm) deep.
3 Install the exterior keypad

A What is the diameter of the hole in the door?

D Install the exterior keypad and mounting plate.

B Locate the screws for step D and keep them within reach.

C Remove the mounting plate from the interior assembly.

4 Install the interior assembly

A Ensure the turnpiece shaft is pointing up, and remove the interior cover and battery pack from the exterior assembly.

B Install the interior assembly onto the mounting plate.

C If the turnpiece shaft is pointing down, place the cover back on and rotate the turnpiece until you hear it click. You may need to apply some force. Once the turnpiece shaft is correctly oriented, reinsert the cover again.
Install the batteries and perform the door handing process

This step will teach your lock the orientation of your door and is crucial to lock operation.

A. Install 4 AA batteries in the battery pack.
B. With the door open, install the battery pack to initiate auto-handing.
C. The latch will retract and extend to learn the orientation of the door.
D. The Status LED will indicate success or failure.

If the bolt does not move, make sure the batteries are correctly installed, and perform step B again.

Green: Door handing was successful. Proceed to next step.
Red: Door handing was unsuccessful. Make sure the lock interior and batteries are correctly installed. Perform step B again.
If the door handing process is still unsuccessful after a second attempt, see the Manual Door Handing section on page 4.

Test the lock and check door alignment

A. With the door open, insert the key to extend the latch. Ensure that the latch extends smoothly.
B. Turn the key 180° to retract the latch. Ensure that the latch retracts smoothly.
C. Close the door, insert and rotate the key to lock the door. Ensure that the door locks smoothly.
D. Turn the key 180° to retract the latch. Ensure that the door unlocks smoothly.

If your door does not lock and unlock smoothly, make sure you replaced your previous latch and strike with those supplied in the box.
If you still experience locking errors, call Kwikset Support to order a Warped Door Service Kit.

Install the interior cover

Important Information about the interior cover

The window on the interior cover is unlocked by default for easier access to the battery pack and buttons.

For additional security, you may choose to lock the window by installing the security screw.

When the window is locked, you will need to remove the entire interior cover and screws to access the battery pack and buttons.

Cover Installation

1. Install cover.
   - Note: You may need to rotate the turn piece to align with the turn piece shaft.

Battery Pack Access

1. Install screws.
   - If the window is unlocked, slide the window up to access the battery pack.
   - If the window is locked, remove the interior cover and screws to access the battery pack.

Download the app and create an account

The Kwikset app is needed to use this lock. If this lock was professionally installed or installed by someone other than the homeowner, make sure this step is performed by the homeowner.

A. Download the Kwikset app by scanning the QR code or visiting www.kwikset.com/app on your smartphone.
B. Create your account and follow the setup instructions in the Kwikset app.
## Halo Keypad at a Glance

![Halo Keypad Image]

**Tip:** To light up the keypad while the door is locked, press the Lock button before entering your user code. The keypad will not light up if the door is unlocked.

## Status LED colors

These features can be adjusted in some smart home apps.

<table>
<thead>
<tr>
<th>Status LED color</th>
<th>Lock Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green (solid)</td>
<td>Action successful</td>
</tr>
<tr>
<td>Green (blinking)</td>
<td>Unlocked</td>
</tr>
<tr>
<td>Red (solid)</td>
<td>Door handling process unsuccessful</td>
</tr>
<tr>
<td>Red (blinking)</td>
<td>Action unsuccessful or incomplete</td>
</tr>
<tr>
<td>Blue (solid)</td>
<td>Bluetooth pairing successful</td>
</tr>
<tr>
<td>Blue (blinking)</td>
<td>Bluetooth Pairing Mode</td>
</tr>
<tr>
<td>Amber (solid)</td>
<td>Entering Network Reset mode</td>
</tr>
<tr>
<td>Amber (blinking)</td>
<td>Network or System Reset mode</td>
</tr>
</tbody>
</table>

## Network Reset

Network Reset will delete all WiFi settings, Bluetooth pairings, user associations, and remove the lock from the account.

1. Press and HOLD "A" for 10 seconds. You will hear a short beep and see an amber LED. Note: After 3 seconds, you will hear a short beep and see a blue LED. You should continue to hold "A" to enter network reset mode.
2. Release "A". You will hear a blinking amber LED to indicate it is in network reset mode.
3. Press and release the Program button to confirm network reset.
4. If successful, you will hear a long beep and see a green LED if unsuccessful, you will hear a rapid beep and see a blinking red LED. If unsuccessful, repeat from step 1.

## Manual Door Handling

If needed, the door handling process can be initiated manually. This is useful if the lock is being moved to a different door.

1. Remove battery pack.
2. Press and HOLD the Program button while inserting the battery pack. Remove the program button after 3 seconds. The status LED will flash red and green.
3. Press the Program button once more.
4. The latch will extend and retract to reposition the orientation of the door. The LED will flash green if handling is successful or red if handling is unsuccessful.

## System Alerts

<table>
<thead>
<tr>
<th>Alert</th>
<th>Reason</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Keypad flash red twice with one beep</td>
<td>One incorrect code entered</td>
<td>Re-enter code.</td>
</tr>
<tr>
<td>Keypad flash red three times with three beeps</td>
<td>No user code programmed</td>
<td>Program at least one user code.</td>
</tr>
<tr>
<td>Keypad flash red five times with five beeps</td>
<td>Three incorrect codes entered</td>
<td>Re-enter code after 45 second keypad lockout.</td>
</tr>
<tr>
<td>Keypad flash red with fast beeping sound for three to five seconds</td>
<td>Low battery</td>
<td>Replace batteries.</td>
</tr>
<tr>
<td>Keypad flash red with continuous beeping sound for two seconds</td>
<td>Doorjarred while attempting to lock</td>
<td>Verify lock is open and need not be repositioned.</td>
</tr>
<tr>
<td>Keypad flash red with continuous beeping sound for one second</td>
<td>Lock bezel not securely attached</td>
<td>Replace battery pack, remove the keypad to select the required battery pack.</td>
</tr>
</tbody>
</table>

*Beeping sounds will only be heard if lock sounds have not been disabled in the app.*

## System Reset

System Reset will delete all access codes and reset settings including lock handling. The lock will then begin the handling process at the end of the System Reset.

1. Press "A" 10 times. You will hear a short beep and see a blinking amber LED to indicate it is in system reset mode.
2. Press and release the Program button to confirm system reset.
3. If successful, you will hear a long beep and see a green LED. If unsuccessful, the auto-handle process will begin.

## Factory Reset

Factory Reset will delete all WiFi settings, Bluetooth pairings, user associations, remove the lock from the account, and reset all lock settings including handling.

1. Remove battery pack.
2. Press and HOLD the Program button while inserting the battery pack. Keep holding the button for 30 seconds until the lock bezels and the status LED flash red.
3. Press the Program button once more. The LED will flash green and red, and the auto-handle process will begin.
4. The latch will extend and retract to reposition the orientation of the door. The LED will flash green if handling is successful or red if handling is unsuccessful.

## Troubleshooting

![Troubleshooting Image]

A complete Halo Keypad Programming and Troubleshooting Guide is available at [www.lockset.com/halo/support](http://www.lockset.com/halo/support)

## SmartKey Re-Keying

Rekey the lock to work with your existing key. See the supplied SmartKey Re-key instructions for more information.

Note: If Auto-Lock is enabled, remove the battery pack before rekeying your lock.

## Important Safeguards

1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Protect your user codes.
5. Dispose of used batteries according to local laws and regulations.

**WARNING:** This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by feasible or technical means, or evaded by entry above the lock. No lock can substitute for caution, awareness of your environment, and common sense. Builder’s hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.
