1 Prepare the door and check dimensions

A Make sure your door is compatible. If you have a standard deadbolt mounted separately from the handle below it, your door is compatible.

B Remove your existing deadbolt from your door.

C Measure to confirm that the hole in the door is either 2-3/8" (54 mm) or 1-3/4" (38 mm).

D Measure to confirm that the backset is either 2-3/8" or 1-3/4" (58 or 64 mm). Consult the standard drilling instructions at kwikset.com/about/tech.

E Measure to confirm that the hole in the door is either 1-7/8" (44 mm) or 1" (25 mm).

F Measure to confirm that the door is between 1-3/4" and 2-3/4" (45 mm and 70 mm) thick.

2 Install the latch and strike

A Is the door edge chiseled?

B Hold the latch in front of the door hole, with the latch face flush against the door edge.

D Which latch are you installing?

C Is the D-shaped hole centered in the door hole?

E Install the strike on the door frame. Make sure the hole in the door frame is drilled a minimum of 1 1/2" (38 mm) deep.
### 3 Install the exterior keypad

**A** What is the diameter of the hole in the door?

- **Diameter is 2-1/8" (54 mm)**
- **Diameter is 1-1/2" (38 mm)**

   Adapter Ring is required for installation on Exter厄 Assembly.

   Adapter Ring is not needed for installation and may be discarded.

**B** Locate the screws for step 3D and keep them within reach.

**C** Remove the mounting plate from the interior assembly.

**D** Install the exterior keypad and mounting plate.

- Support the exterior assembly during mounting plate installation.
- The cable passes underneath the latch.
- Route the cable through the center hole, then push it into the bottom hole.
- Keep parallel to the edge of the door.
- Reset the key and test the latch. If the latch does not extend or shorten, adjust the screw.
- Remove the key when finished, and make sure the latch bulb is fully extended.

### 4 Install the interior assembly

**A** Ensure the turnpiece shaft is pointing up, and remove the interior cover and battery pack from the interior assembly.

**B** Install the interior assembly onto the mounting plate.

- Make sure turn piece shaft is related to screen.
- If turnpiece shaft is not oriented correctly, put the cover back on and rotate the turnpiece as shown in box C.
- Lay the excess cable flat beside the bottom of the interior housing.
- Ensure light cable connection.

**C** If the turnpiece shaft is pointing down, place the cover back on the interior assembly and rotate the turnpiece until you hear a click. You may need to apply some force. Once the turnpiece shaft is correctly oriented, remove the cover again.

**D** Do not install batteries until step 5.
5 Install the batteries and perform the door handing process

This step will teach your lock the orientation of your door and is crucial to lock operation.

A Install 4 AA batteries in the battery pack.
B With the door open, install the battery pack to initiate auto-handing.
C The latch will retract and extend to learn the orientation of the door.

If the door does not move, make sure the batteries are correctly installed, and perform step B2 again.

D The Status LED will indicate success or failure.

6 Test the lock and check door alignment

A With the door open, insert the key to extend the latch. Ensure that the latch extends smoothly.
B Turn the key 180° to retract the latch. Ensure that the latch retracts smoothly.
C Close the door, insert and rotate the key to lock the door. Ensure that the door locks smoothly.
D Turn the key 180° to retract the latch. Ensure that the door unlocks smoothly.

If your door does not lock and unlock smoothly, make sure you replaced your previous latch and strike with those supplied in the box.
If you still experience locking errors, call Kwikset Support to order a Warped Door Service Kit.

7 Install the interior cover

Important Information about the interior cover

The window on the interior cover is unlocked by default for easier access to the battery pack and buttons.

For additional security, you may choose to lock the window by installing the security screw.

When the window is locked, you will need to remove the entire interior cover and screws to access the battery pack and buttons.

Cover Installation

A Install cover.
   Note: You may need to rotate the turn piece to align with the turn piece shaft.

Battery Pack Access

A If the window is unlocked, slide up the window to access the battery pack.
B If the window is locked, remove the interior cover and screws to access the battery pack.

8 Download the app and create an account

A Download the Kwikset app by scanning the QR code or visiting www.kwikset.com/app on your smartphone.
B Create your account and follow the setup instructions in the Kwikset app.

The Kwikset app is needed to use this lock. If this lock was professionally installed for installed by someone other than the homeowner, make sure this step is performed by the homeowner.

Manual Door Handling

If needed, the door handling process can be initiated manually. This is useful if the lock is being moved to a different door.

1. Remove battery pack.  
2. Press and HOLD the Program button while inserting the battery pack. Remove the battery pack. The status LED will flash red and green.  
3. Press the Program button once more.  
4. This latch will extend and retract to reposition the orientation of the door. The LED will flash green if handling is successful or red if handling is unsuccessful.

Network Reset

Network Reset will delete all Bluetooth pairings, user associations, and remove the lock from the account.

1. Press and HOLD “A” for 10 seconds. You will hear 7 short beeps and see a amber LED.  
2. Release “A”. You will hear a blinking amber LED to indicate it is in a network reset mode.  
3. Press and release the Program button to confirm network reset.  
4. If successful, you will hear 7 long beeps and see a green LED. If unsuccessful, you will hear 7 rapid beeps and see a blinking red LED. If unsuccessful, repeat from step 1.

System Reset

System Reset will delete all access codes and user settings including lock handling. This lock will run the handling process at the end of the System Reset.

1. Press “M” 10 times. You will hear 11 short beeps and see a blinking amber LED to indicate it is in a system reset mode.  
2. Press and release the Program button to confirm system reset read.  
3. Successfully, you will hear 1 long beep and see a green LED and the read process will begin. During the read process, the LED will blink green a few times and will beep when complete.  
4. Unsuccessful, you will hear 11 rapid beeps and see a blinking red LED. If unsuccessful, repeat from step 1.

Factory Reset

Factory Reset will delete all Bluetooth pairings, user associations, remove the lock from the account and reset all lock settings including handling.

1. Remove battery pack.  
2. Press and HOLD the Program button while inserting the battery pack. Keep holding the button for 30 seconds until the lock beeps and the status LED flashes red.  
3. Press the Program button once more. The LED will flash green and red, test the auto-handling process will begin.  
4. The latch will extend and retract to reposition the orientation of the door. The LED will flash green if auto-handling is successful or red if auto-handling is unsuccessful.

Troubleshooting

- A complete Aura Bluetooth Keypad Programming and Troubleshooting Guide is available at [www.kwikset.com/aura/support](http://www.kwikset.com/aura/support)

Important Safeguards

1. Read all instructions in their entirety.  
2. Familiarize yourself with all warning and caution statements.  
3. Remind all family members of safety precautions.  
4. Protect your user codes.  
5. Dispose of used batteries according to local laws and regulations.
